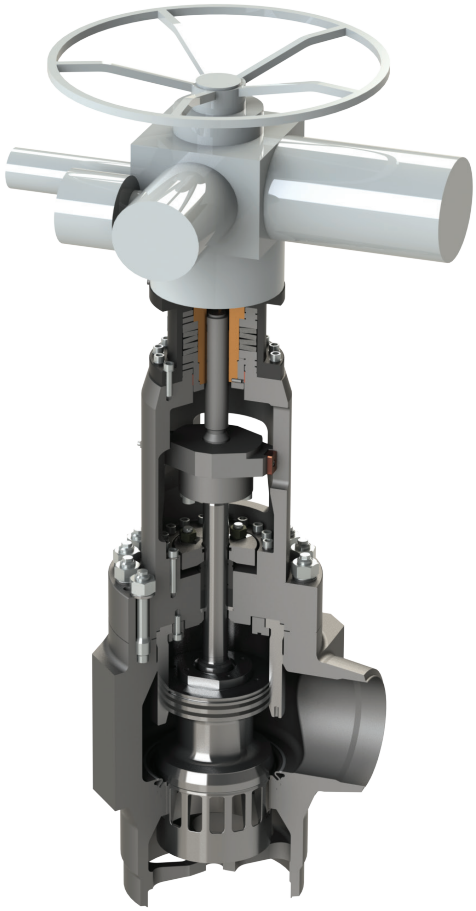
IMI CCI™

NB Type Globe Valve

Main feed-water and bypass feed-water control



IMI Critical Engineering

Breakthrough Engineering

NB Type Globe Valve

Main feed-water and bypass feed-water control

Electro-motor or hand operated control valve

Used for:

- MFWV (main feed-water control valve)
- By-pass feed water valve
- Control valve as part of the atmospheric steam dump valve

Key features

- Size up to 17.7"/ up to 450 mm
- Class up to 1500
- Forged/cast carbon or stainless steel
- Variety of different qualification programs for water and two-phase flows

Benefits

- Stable performance and very high tightness classes
- Ability to cover the big range of controllability, using disc-stack
- Usage of IEEE qualified electromotor
- IMI CCI's own protection system against mechanical overload
